# Data Acquisition

**DATAPRO SOFTWARE**

**AUTO METER DATAPRO DESIGNER MAKES SETTING UP YOUR NEW SYSTEM OR CHANGING / ADDING SENSOR CHANNELS SIMPLE WITH DRAG AND DROP FUNCTIONALITY. LOCATE THE SENSOR YOU'VE PLUGGED INTO THE SYSTEM FROM THE MENU ON THE LEFT, DRAG IT ONTO THE INPUT CHANNEL THAT MATCHES ITS CURRENT LOCATION, DROP IT IN THE DESIRED BOX, SELECT A CHANNEL NAME FROM THE DROP DOWN MENU AND YOU'RE DONE!**

**GET THE MOST OUT OF YOUR SYSTEM AND TIME AT THE TRACK BY DIALING IN YOUR CHANNEL SAMPLE RATES. USER SELECTABLE UP TO 200HZ (SAMPLES PER SECOND) PER CHANNEL. DATAPRO DESIGNER INSTANTLY INFORMS YOU OF HOW YOUR CHOICES IMPACT YOUR AVAILABLE RECORDING TIME. NOTE FOR THE SAMPLE SETUP SHOWN, THAT RECORDING TIME IS IN EXCESS OF 14 MINUTES!**

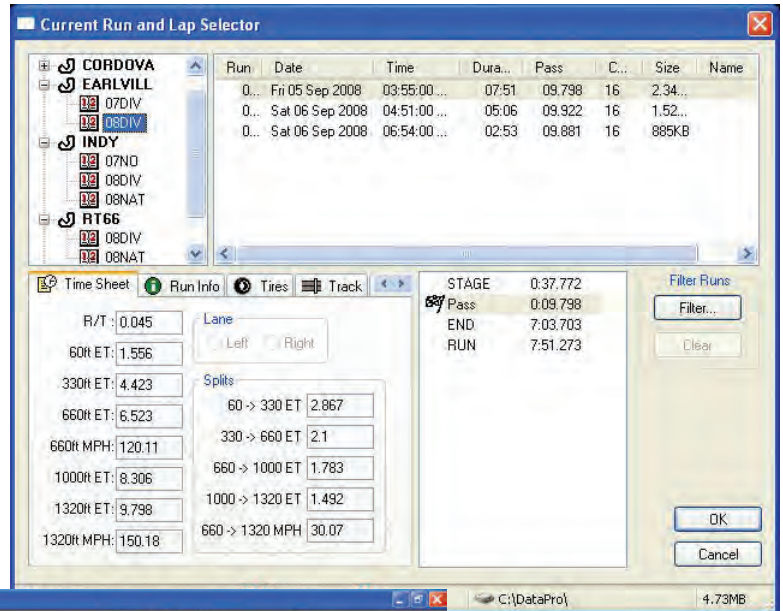

**UTILIZE DATAPRO DESIGNER SOFTWARE TO CUSTOMIZE ALARMS AND RECORDING TRIGGERS SPECIFICALLY TO YOUR VEHICLE. DIAL IN THE VISUAL WARNINGS FOR YOUR DISPLAY, AND THEN GATE THEM TO PREVENT FALSE WARNINGS. A GATE IS ANOTHER QUALIFICATION THAT HAS TO OCCUR WHEN THE ALARM PARAMETER IS REACHED IN ORDER TO TRIGGER THE ALERT. EXAMPLE: A LOW OIL PRESSURE ALARM BY ITSELF WILL TRIGGER WHENEVER OIL PRESSURE IS BELOW THE ALARM POINT, EVEN WHEN THE ENGINE IS NOT RUNNING. TO REMOVE THIS FALSE ALARM, ADD AN ENGINE RPM GATE EQUIVALENT TO YOUR IDLE SPEED. NOW YOU'LL ONLY RECEIVE A LOW OIL PRESSURE ALERT WHEN BOTH THE ENGINE IS RUNNING AND THE OIL PRESSURE IS LOW.**

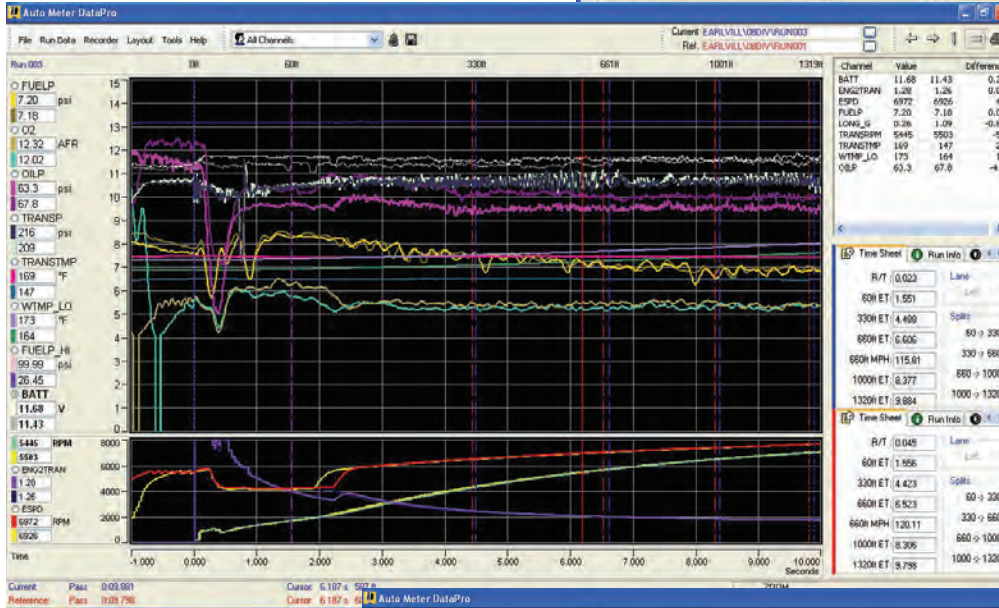

# Data Acquisition

## DATAPRO SOFTWARE

**SORT RECORDED DATA BY TRACK, AND RECORD PERTINENT INFO WITH THE LOGBOOK FEATURE ABOUT TRACK AND VEHICLE CONDITIONS FOR LATER REVIEW. RECORDED RUNS ARE TIME STAMPED WHEN THEY ARE RECORDED RATHER THAN WHEN THEY ARE DOWNLOADED, SO THAT IN THE EVENT THAT YOU'RE HOT-LAPPING, THE GUESS WORK ON WHICH DATA IS FROM WHICH RUN IS ELIMINATED.**

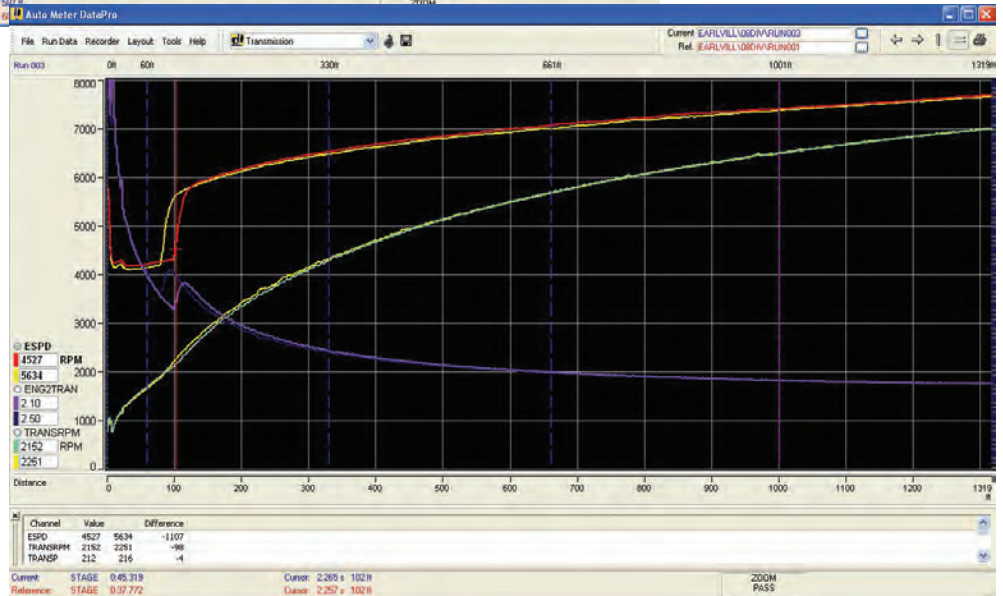

**DATAPRO ANALYSIS SOFTWARE COMES STANDARD WITH ULTRA-LITE PRO DATA ACQUISITION SYSTEMS AND PRO-COMP PRO MFDL. COMPATIBLE WITH MICROSOFT WINDOWS 7, VISTA AND XP EQUIPPED COMPUTERS.**

**PERSONALIZE THE AUTO METER DATAPRO SOFTWARE TO YOUR NEEDS. VIEW AS MUCH OR AS LITTLE DATA AS YOUR ANALYSIS REQUIRES. SET CUSTOM LAYOUTS THAT SHOW THE DATA THAT YOU WANT IN THE FORMAT THAT YOU WANT TO SEE IT.**

**REVOLUTIONARY DATAPRO SOFTWARE NOW ALLOWS YOU TO VIEW DATA BASED ON DISTANCE. SEE WHERE EXACTLY ON THE TRACK A PARTICULAR CONDITION OCCURRED. COMPARE RUNS BASED ON DISTANCE RATHER THAN TIME FOR A MORE COMPLETE UNDERSTANDING OF HOW VEHICLE SETUP AND TRACK CONDITIONS AFFECT YOUR TIMES.**

### STANDARD FEATURES

#### DUAL CHANNEL MODELS RECORD BOTH ENGINE AND DRIVESHAFT RPM

THIS ENABLES YOU TO ANALYZE TORQUE CONVERTER/CLUTCH PERFORMANCE, TIRE SLIPPAGE OR SHAKE, SHIFT POINTS, AND MORE. PLAYBACK CAN BE PAUSED AT ANY POINT ON THE LED CLOCK TO ALLOW YOU TO TOGGLE BETWEEN ENGINE, DRIVESHAFT, AND ENGINE TO DRIVE RATIO FOR DIRECT COMPARISON. WITH THE TACH FACTS SOFTWARE LISTED TO THE RIGHT, THIS DATA CAN BE ANALYZED DOWN TO 1/100TH OF A SECOND.

#### PLAYBACK DATA ON TACH FACTS

REVIEW RUN DETAILS AFTER A PASS IS COMPLETE RIGHT ON THE TACH FACE. SELECT ENGINE OR DRIVESHAFT RPM TO BE SHOWN WITH THE POINTER. DISPLAY ADDITIONAL RECORDED DATA IN DIGITAL FORMAT ON THE GRAPHIC LCD. PLAY, PAUSE, FAST FORWARD AND REWIND THROUGH THE RUN USING BUTTONS RIGHT ON THE FACE OF THE TACH!

#### 4-STAGE SHIFT-LITE OUTPUT

FEATURES FOUR SHIFT POINTS FOR OPTIMUM CONTROL. YOU CAN NOW DIAL IN ON THE ANTICIPATED RPM RISE FOR EACH INDIVIDUAL GEAR. THIS WILL INCREASE CONSISTENCY AND GUARD AGAINST UNNECESSARY RPM SPIKES. SHORT SHIFT PROTECTION ENSURES THAT IF YOU HAPPEN TO SHORT SHIFT, THE TACH KNOWS TO ACTIVATE THE NEXT SHIFT POINT.

#### 100 SAMPLES PER SECOND RECORDING

100 SAMPLES PER SECOND PROVIDES THE SMOOTHEST PLAYBACK POSSIBLE. THIS ALSO MEANS YOU HAVE .01 SECOND ACCURACY ON THE LED TIME CLOCK DURING PLAYBACK.

#### DATA PRO SOFTWARE

DOWNLOAD DATA TO YOUR PC VIA USB. ANALYZE ENGINE RPM, DRIVESHAFT RPM, ENGINE/DRIVESHAFT RATIO AND MORE USING SOPHISTICATED BUT SIMPLE TO USE DATAPRO SOFTWARE. SEE WHAT HAPPENED DURING A PASS AND WHERE!

## TACH FACTS™ SOFTWARE FOR ULTIMATE & ULTIMATE II

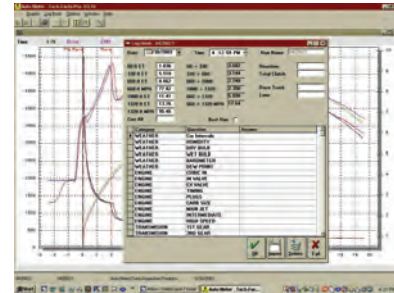

SOFTWARE	REQUIREMENTS	INCLUDES/DETAILS	MODEL NUMBER
Tach Facts v3.1*	MINIMUM PENTIUM II OR EQUIVALENT PROCESSOR, CD-ROM DRIVE AND WINDOWS 95, 98, 2000, NT MILLENNIUM, OR XP (NOT COMPATIBLE WITH VISTA)	INCLUDED WITH DUAL CHANNEL TACHOMETERS OR DIRECTLY FROM AUTO METER ONLY. SOFTWARE IS SENT ON CD. INCLUDES TWO RUN OVERLAY, LOGBOOK, TRACK INTERVAL ANNOTATION, AND SPLIT TIME CALCULATIONS.	6890

\* Serial to USB adapter (not included) required for download and analysis on PC's without a serial port.

WHEN TIME SLIP DATA IS ENTERED INTO THE LOGBOOK, THE SPLIT TIMES ARE AUTOMATICALLY CALCULATED AND DISPLAYED NEXT TO THE INTERVAL TIMES. THESE TRACK INTERVALS WILL THEN BE DISPLAYED ON THE GRAPH AS WELL. THIS ENABLES THE CREW TO MAKE DECISIONS BASED ON WHAT IS HAPPENING AT GIVEN POINTS ON THE TRACK. IT ALSO SAVES TIME FOR THOSE RACERS ALREADY TUNING TO INTERVAL AND SPLIT TIMES SINCE THEY NO LONGER ARE REQUIRED TO "DO THE MATH" AFTER EACH RUN.

TACH-FACTS™ SOFTWARE OFFERS THE ABILITY TO STORE AND RETRIEVE RACING DATA IN A "RACING LOG BOOK". IMPORT EXISTING PAPER LOGBOOKS INTO THE DATA BASE. RUNS CAN BE RETRIEVED AUTOMATICALLY USING THE LOG BOOK SEARCH "ENGINE". SEARCH FOR PAST RUNS BY ONE OR UP TO 18 DIFFERENT CATEGORIES SUCH AS CORRECTED ALTITUDE, E.T.S, MPH, TRACK LOCATION, DATE, AND MORE. AS RUNS ARE RETRIEVED, IMPORTANT SET-UP INFORMATION CAN BE VIEWED OR GRAPHED.

Show your need for speed with great looking apparel from Auto Meter. See the Apparel Section for details.

For the ultimate in shift light technology the 5332 and the 5333 in the Accessories Section are the perfect choice.

The 9117 Tach Adapter lets you connect to a distributorless ignition system. See Accessories Section for details.

# TIRE PRESSURE MONITORING SYSTEM

## SYSTEM INCLUDES

Auto Meter's Ultra-Lite Pro TPMS System featuring Stack Technology completely redefines tire pressure monitoring in the racing world. Based on patented SAW sensor technology, there are no batteries to change, no large, heavy, and complicated sensors to mount.

## WHY YOU NEED THE AUTO METER ULTRA-LITE PRO TIRE PRESSURE & TEMPERATURE MONITORING SYSTEM:

Every time you strap in to your race vehicle you rely on your tires to grapple with the track and translate the mountain of power from your precision built engine into blinding acceleration, bring you back from the brink of disaster, and guide you across the finish line ahead of the competition. Among racing enthusiasts it's a well known fact that to get the most out of your tires you need to be operating at the optimum temperature and pressure, but most methods can only show you before and after data, leaving you to guess what happened in between and make decisions from race to race based on what you don't know. Don't compromise your safety or leave the door open to the competition by working from outdated technologies and guesswork! Now you can view and record PRECISELY what your individual tire pressures are and whether they have enough heat in them real time while setting up alarm conditions to provide early alert of hazardous conditions before they ruin your day.

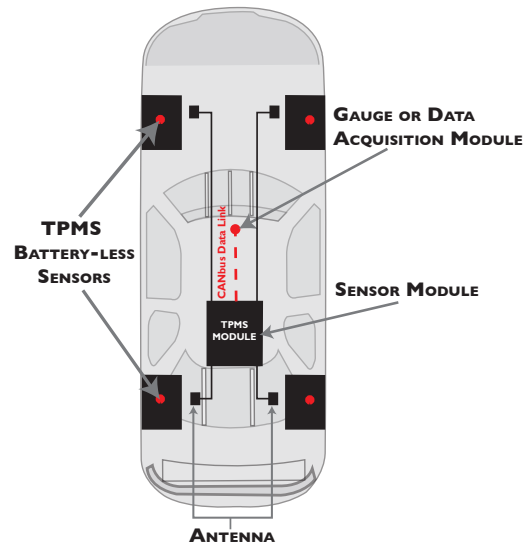

Early detection of a puncture - before the driver feels it - improved driver safety, avoid blowouts to save \$100's or even \$1000's of vehicle damage cost! Dynamic tire pressure monitoring while out on the track allows the team to optimize tire performance over the whole lap and/or race.

### KEY FEATURES OF THE AUTO METER ULTRA-LITE PRO TPMS SYSTEM INCLUDE:

- No battery or sensor electronics - providing unrivalled reliability in an incredibly small and lightweight sensor to minimize unsprung weight.
- Smallest TPMS sensor on the market - 18mm diameter x 14mm depth (excl. valve stem); .35oz (10g) weight.
- Battery-less Sensors - No user maintenance required during full service life of sensor significantly reducing total life running costs, letting you do more with your racing budget.
- Compact, lightweight interrogator module - 100mm x 72mm 24mm; 140g.
- 2Hz update rate, samples twice a second; 0.25 PSI / 1.8°F (1°C) resolution; +/- 0.5 PSI / 3.6°F (2°C) accuracy.

### BUILD YOUR SYSTEM TO MATCH YOUR SPECS:

- Monitor 2 or 4 wheels - suitable for drag cars, circuit, and oval applications.
- 2 1/16" gauge display in popular Pro-Comp Pro black and Ultra-Lite Pro silver dial designs provides comprehensive pressure and temperature information with color coded indication and user programmable alarm warnings.
- Visual warning of cold tires, and when they're up to temperature. Are your pace lap maneuvers warming the tires properly? Was the burnout big enough? CAN datalogging output of pressures and temperatures - Feed data from your Ultra-Lite Pro TPMS system to your Ultra-Lite Pro Data Acquisition system or Pro-Comp Pro Multi-Function Dash Logger to enhance your post race analysis and gain the extra traction and performance you need to take the checkered flag.

# PRODUCT FEATURES

## SHORT SWEEP ELECTRIC GAUGES

Advanced 90 degree air core movements and simple three wire installation characterize these high performance instruments. Electric sending units keep hazardous fluids in the engine compartment & send collected data via an electrical signal to quick reacting, precise air core movements. These gauges give you all the information that you need, and nothing that you don't.

## FULL SWEEP MECHANICAL GAUGES

Bronze bourdon tube 270 degree sweep movements and durable nylon gearing have made these rugged and long lasting gauges a proven high performance favorite for over 25 years. Mechanical gauges require no electrical power for operation, making them an ideal choice for vehicles with no or low powered electrical systems.

Note: Probe size on mechanical temperature gauges makes them a less than ideal choice for Import and some modern Domestic engines. Auto Meter suggests Short Sweep Electric or Full Sweep Electric gauges for these applications.

## LIQUID FILLED GAUGES

They just don't come any tougher than this! Auto Meter 2 5/8" Pro-Comp Liquid Filled Gauges are engineered with the rugged movements of our Full Sweep Mechanical Gauges and a specially formulated vibration dampening liquid to survive the most brutal vibration & elemental exposure in competition motorsports. Environmentally sealed, these instruments are ideal for cowl and engine mount, as well as dashboards where exposure to the elements is certain (off-road, dirt track, & open cockpit vehicles).

## FULL SWEEP ELECTRIC GAUGES

Powered by digital microprocessor-controlled, rugged stepper motor drives & laboratory grade sending units, Full Sweep Electric Gauges are the BEST gauges available! They combine Extreme Durability & Readability of 270 degree sweep mechanical gauges with the Easy Installation & Safe Operation of short sweep electrics. Track Tested & Race Proven, these units use precision senders to keep hazardous fluids out of the driver compartment, and perform gauge calibration and sensor diagnostics at power up for Extreme Accuracy, every time. Include snap fit harnesses for easy installation and disconnect for vehicle maintenance.

## PROGRAMMABLE FUEL LEVEL GAUGES

Planning to replace your fuel level gauge or add a fuel level gauge to an unknown tank and sending unit combination? Our Programmable Fuel Level gauges are the best solution. These 270 degree sweep electric stepper motor gauges come pre-programmed to work with the 7 most common preset sending unit values in the industry. In the event that your sending unit values do not match one of these presets, these gauges feature easy programming that allows you to tailor the gauge scale precisely to your set-up with no frustration or added cost. Ideal for Imports, Modern Domestic, and Street Rods!

## ELECTRIC PROGRAMMABLE SPEEDOMETERS

Looking to replace your speedometer? Our Electric Programmable Speedometers are the ticket! Simple wiring connections and easy to use push button programming make installation and calibration a snap. Compatible with most OE vehicle speed sensors, as well as aftermarket speed pulse generators. Auto Meter Electric Programmable Speedometers can be easily recalibrated at any time for any gear or wheel & tire changes you may make to your vehicle. Includes backlit LCD odometer and two reset-able trip odometer display.

## PERIMETER INCANDESCENT LIGHTING

Auto Meter instruments with Perimeter Incandescent Lighting utilize white light bulbs to spill soft light around the edges of the instrument dial and reflected off of a three dimensional pointer design for night time illumination that's easy on the eyes. Red and Green bulb covers are included to allow you to customize the illumination color.

If you're looking for more color with these instruments, check out our Replacement LED bulbs in the Accessories section. Available in Red, Green, Blue, & Amber, LED bulbs draw less current, produce brighter colored light, are more vibration resistant and are longer lasting than conventional bulbs.

Note: Check the Buyer's Guide section to find out which gauge series have Perimeter Incandescent Lighting.

## THROUGH THE DIAL & FULL DIAL LED LIGHTING

Auto Meter instruments with Through The Dial & Full Dial LED Lighting feature bright, crisp, and distinctly illuminated numbers, increments, and a glowing lit pointer! Our Hi-Def style Through The Dial & Full Dial LED Lighting is the brightest available, utilizing special composite dials, surface mount LEDs, and a patented lit pointer design to provide maximum visibility and readability day or night! Note: Check the Buyer's Guide section to find out which gauge series have Through The Dial & Full Dial LED Lighting. Illumination colors are standard/unchangeable. LED replacement bulbs not compatible with Through the Dial & Full Dial LED lit designs.

## DUAL RANGE TACHOMETERS

Dual-Range Tachometers from Auto Meter feature a compressed lower RPM scale and an expanded upper scale for enhanced clarity and extreme resolution where it counts! These tachometers are ideal for high-revving motors that spend most of their time in the upper rev band, such high performance applications include drag & road racing, circle track, and drift vehicles. Dual-Range tachometers also feature Memory/Recall so that you can review the highest RPMs achieved while you were out on the track from the comfort of the pits.

## WARNING & SHIFT LITE

When fractions of a second count, and 1 psi of boost separates big power from big problems, use Auto Meter instruments featuring Warn and Shift-Lite functions to nail every shift point and tune your ride to perfection!

Created with the driver in mind, instruments with Warn and Shift-Lite functions have easy to use push button & dial-in accuracy so each warning and shift point is an exact match for your vehicle and driving style. Super Bright incandescent bulbs & LEDs built into instruments with these features provide an instant visual alert to critical conditions (ideal for noisy high performance and race vehicles), and can make the difference between a checkered flag and an expensive DNF!

## LAUNCH LITE

Improve reaction times and nail launch RPMs with tachometers and Digital Pro Shift lights from Auto Meter featuring our patented Launch Lite! Dial in exact launch RPM with easy push button programming, then keep your eyes on the tree and let Launch Lite show you when you're at the correct launch RPM.

Here's how it works!

Stage your vehicle with the Launch Lite feature active:

- Launch Lite/Shift light will turn off when engine RPM drops below your launch point
- Launch Lite/Shift light will light solid when engine RPM is at your launch point
- Launch Lite/Shift light will blink rapidly if engine RPM raises above your launch point
